

Press Release

8th July 2026 – For Immediate Release

Mo.net 7.8

Software Alliance Limited ("SAL"), the developers of the award-winning Mo.net financial modelling platform, today announces the release of Mo.net 7.8.

Mo.net 7.8 is the latest version of the award-winning service-oriented financial modelling and calculation platform. Specifically designed to support the evolving needs of next-generation insurers, this release introduces a broad range of enhancements focused on governance, user experience, performance, scalability and enterprise integration.

The new release continues to refine the end-to-end modelling experience while extending the platform's integration capabilities across modern enterprise and cloud environments. Mo.net 7.8 enables organisations to develop, deploy, integrate and operate financial models and calculations faster, more efficiently and with greater control.

Improvements have been made across four key areas:

Governance & Control

Mo.net 7.8 delivers enhanced governance and operational control throughout the model development lifecycle, helping organisations strengthen quality assurance, compliance and collaborative development.

The release includes:

- Expanded unit testing and quality assurance capabilities.
- Reinforced governance for source control and change management.
- Standardised reporting and project configuration processes.
- Strengthened project integrity, validation and dependency management.
- Enhanced backup, recovery and deployment controls.
- Improved consistency and auditability across collaborative development activities.

Performance & Scalability

Mo.net 7.8 introduces significant platform enhancements designed to support increasingly demanding enterprise workloads.

The release includes:

- Increased scalability for distributed and parallel processing.
- Greater platform stability and runtime resilience.
- Faster reporting and analytical processing.
- Optimised handling of large and complex enterprise models.
- Expanded monitoring and diagnostic capabilities.
- Improved efficiency and reliability across distributed execution environments.

User Experience

Continuing our focus on usability, Mo.net 7.8 streamlines common workflows and provides a more intuitive experience for both developers and operational users.

The release includes:

- A modernised user interface and installer experience.
- Simplified reporting and workflow management interactions.
- Improved navigation throughout development workflows.
- Clearer validation, messaging and operational feedback.
- Greater consistency across regional and localisation settings.
- Improved visibility of system and worker status information.

Enterprise & Cloud Integration

Mo.net 7.8 further extends the platform's integration capabilities, enabling customers to connect seamlessly with enterprise systems and cloud-based architectures.

The release includes:

- Expanded cloud and enterprise platform integration capabilities.
- Enhanced distributed processing and master/worker connectivity.
- Improved interoperability with enterprise data platforms, including support for Parquet.
- Advanced source control and collaborative development workflows.
- Streamlined deployment and integration of reporting services.
- Increased scalability for large enterprise environments.

Nick Hucker, Commercial Director at Software Alliance, commented:

"Mo.net 7.8 represents another significant milestone in the evolution of the platform. As insurers continue to modernise their technology estates, they need modelling platforms that not only deliver exceptional calculation performance but also integrate seamlessly into enterprise architectures while providing the governance, transparency and operational resilience expected of mission-critical systems. This release reflects our continued investment in helping customers build, deploy and manage financial models with greater confidence, efficiency and control."

About Software Alliance

Software Alliance Limited ("SAL") is a UK-based specialist software house, formed in 2006 to develop financial modelling software and services for the insurance industry.

Our innovative solutions offer unsurpassed levels of simplicity, transparency, and productivity. Our industry experience and understanding of specific customer needs, coupled with our investments in leading-edge technology, have made us market leaders, ready to provide the next generation of modelling capability to our customers.

Over the last decade our primary product offering, Mo.net, has evolved significantly and is now relied upon by clients around the globe to provide mission-critical financial modelling, analysis, and decision support.
